# “A Glimpse of Beauty”

Inspired by John Denver’s passion and love for this community, what was once an industrial site and parking lot has been transformed into a series of ponds and native plantings designed to clean 30% of the City’s stormwater, provide habitat for wildlife, and provide a

place for the community to find peace in nature. The smells, sounds, and breathtaking sites have become an epicenter of the Aspen experience. Thousands of people who visit fall in love with the Sanctuary. Come and visit the beautiful gardens and celebrate John Denver, clean water, and the joy of nature on your next visit to Aspen.

Located within Rio Grande Park at the intersection of Mill Street and Rio Grande Place. Parking is available on Rio Grande Place and within the parking garage located at 427 Rio Grande Place. The park may also be accessed on the Rio Grande Trail and the Hunter Creek bus loop.
