KEEP YOUR PET SAFE THROUGH JULY 4TH CELEBRATIONS AND THE SUMMER WITH THESE SIMPLE TIPS:

- Dogs don't sweat like humans and can suffer heatstroke far more easily.
- Check the temperature on the ground; if it's too hot to touch, then it is **TOO HOT** for their PAWS.
- Have water on hand during hot days to avoid dehydration.
- Never leave your dog in a parked car on a warm day. In minutes, the temperature inside a car can soar to dangerously high levels, leaving pets at severe risk of heatstroke and even death.
- Loud, crowded events are no fun for dogs. Resist the urge to bring your pet to the festivities. They will be safe and comfortable at home.
- Be sure your dog is tagged or microchipped in case your furry friend gets loose or runs away.

Enjoy a safe and worry-free Independence Day. Have a great holiday & summer season!
